Company Profile

Bridging education and industry through practical technology learning

LEARN • EARN • GROW

This profile consolidates information from SEOAK's public website and publicly available company-registration information. It is intended as an informative overview and not as an independently audited assessment.

Prepared from public company information • 9 November 2026

1. Company overview

SEOAK Innovations Private Limited is an education and technology-skills training company focused on helping learners bridge the gap between academic learning and industry requirements. Its public website presents SEOAK as a practical learning platform offering technology courses, industrial training programs, internships and career-oriented support.

The company emphasizes hands-on learning, real-world projects, industry-focused curriculum and career preparation. Its offerings span foundational technology courses as well as longer industrial training programs in Data Science, Full Stack Development and Advanced Artificial Intelligence.

Company facts

Company name	SEOAK INNOVATIONS PRIVATE LIMITED

Registered office	Kamunipenta, Warangal, Telangana, India – 506002
Public operating address	Madhapur, Hyderabad, Telangana, India
Website	https://www.seoak.in

2. Purpose and positioning

SEOAK states that its primary objective is to address the gap between industry requirements and the skills held by prospective employees, particularly graduates interested in Information Technology. The company positions its programs around practical experience and skills intended to support career readiness.

Its public messaging also highlights accessible learning, curated courses and professional development. SEOAK's platform includes self-paced and structured learning options alongside longer industrial training programs.

3. Founders and leadership

SEOAK's public About page identifies Akhila Poshala and Shivadath Manchikatla as co-founders. The site presents their leadership focus around education, student success and connecting academic learning with industry requirements.

- Akhila Poshala — Co-Founder; Director of Sales Process Excellence (as listed on the public website).
- Shivadath Manchikatla — Co-Founder; Director of People Operations (as listed on the public website).

4. Core values

SEOAK's public About page highlights three core values:

- Outstanding Quality — pursuing high standards and new ideas to create strong learning and career-development experiences.
- Authenticity — encouraging diverse perspectives, collaboration and a creative environment.
- Innovation — focusing on learner needs and developing distinctive approaches to education and skills development.

5. Courses and learning areas

SEOAK's public platform lists technology courses designed around practical learning and career development. Examples displayed on the website include:

- Programming foundations: C, C++, Python and Java.
- Data Structures and Algorithms.
- Data and analytics: Data Science, Business Analytics and Power BI.
- Software and digital skills: Full Stack Development and Digital Marketing.
- Cybersecurity.

6. Industrial training programs

The company highlights longer industrial training programs, generally presented as career-oriented learning paths of approximately 3–6 months. The main programs displayed publicly include:

Program	Publicly described focus
Data Science Industrial Training Program	Data preprocessing, exploratory analysis, statistics, machine learning, deep learning, big-data concepts and communicating data-driven insights.
Full Stack Development Industrial Training Program	Front-end and back-end technologies, databases, server-side development, frameworks and building scalable web applications.
Advanced AI Industrial Training Program	Machine learning foundations and specialized areas including natural language processing, computer vision and other advanced AI applications.

7. Learning approach and learner support

SEOAK presents its learning model as practical and career-focused. Public program pages describe features such as live classes, problem solving, practice assignments and quizzes, doubt-clearance support, real-world projects, interview preparation and career-support activities. Specific features can vary by program and may change over time.

- Hands-on and practical learning.
- Industry-focused curriculum and mentors.
- Real-world projects and coding practice.
- Resume and LinkedIn review, mock interviews and job-search guidance on selected programs.
- Course completion certificates and learning-community access on selected programs.

8. Hiring and industry connection

SEOAK also presents a hiring-focused offering for organizations seeking trained technology talent. Its public hiring page describes access to learners prepared for roles such as Data Scientist, Data Analyst, Full Stack Developer, Software Engineer, AI Engineer and ML Engineer.

The company describes its training as including programming and logical-ability screening, coding practice, version control, data structures and algorithms, and soft-skills development. These statements describe the company's published training model and should not be interpreted as independently verified placement outcomes.

9. Student and community initiatives

SEOAK's website highlights several initiatives intended to broaden learner engagement and access to career-development opportunities:

- Student Branch — a community initiative described as supporting technical events, certification opportunities and pre-placement engagement.
- Scholarship Program — presented as an effort to make education more accessible and affordable.
- Student Partner Program — focused on connecting technology-minded students with peers and career guidance.
- College, university and corporate training initiatives — positioned as tailored training and technology-learning support.
- Refer and Earn — a referral initiative for sharing SEOAK's learning programs.

10. Partnerships and public ecosystem

SEOAK's website presents a number of organizations and service providers as partnerships or collaborators. These include technology, credentialing, payment, domain, hosting and banking relationships. Partnership scope and status should be confirmed directly with SEOAK before relying on them for a business or employment decision.

The company also highlights educators and industry professionals on its public platform, reflecting its emphasis on practitioner-led instruction.

11. Careers and work environment

SEOAK's careers page presents the company as being on a mission to deliver engaging, curated courses at reasonable prices. Publicly displayed openings have included business and sales roles such as Business Development Executive and Sales Manager.

Current vacancies, role requirements and work arrangements can change. Candidates should check the company's official careers page or contact channels for the latest information.

14. Summary

SEOAK Innovations Private Limited presents itself as an education-technology and career-development company focused on practical technology learning. Its public portfolio combines foundational courses with industrial training programs in areas such as Data Science, Full Stack Development and Advanced AI. The company's positioning centers on hands-on learning, industry relevance, career readiness and connecting students with professional opportunities.

The company is a relatively young private enterprise incorporated in 2023 and operates under the SEOAK brand. Its public website highlights founders, technology educators, learner initiatives, training programs and employer-facing talent support.

15. Sources and verification notes

This document was prepared on 9 November 2026 using public information. Company descriptions and program details are summarized from SEOAK's official website, while incorporation and legal-company facts are based on publicly available company-registration information.

- SEOAK official website — course portfolio, programs, learner initiatives and public positioning.
- SEOAK About page — founders, purpose, values and public recognition details.
- SEOAK Contact and Careers pages — contact channels, office information and publicly displayed vacancies.
- Public company-information databases — incorporation date, CIN, registered address and company status.

Program features, prices, enrollment figures, partnerships, vacancies and contact details may change. Confirm current information directly with SEOAK before making an education, employment, business or financial decision.
